

PROTOCOL
FOR LIFE BALANCE®

OUR PRIORITY: QUALITY

About Protocol For Life Balance®

We are an A-rated GMP manufacturer of premium dietary supplements created for healthcare practitioners. Since 2015, our manufacturing facilities have received yearly accreditations through the joint NPA/UL cGMP certification program. Furthermore, in 2021, our world-class in-house laboratories received the ISO/IEC 17025:2017 accreditation from the American Association for Laboratory Accreditation (A2LA) for both our analytical and microbiological laboratories.

The Practitioner's Choice for Quality & Value

How do we know Protocol For Life Balance® products work? Because they are consistently requested for clinical trials conducted at top universities and research centers around the United States and in other countries. Our product line is comprised of effective, science-based formulations intended to address common nutritional deficiencies and support healthy physiological functions.

These formulations are based on the latest advances in nutritional science and incorporate trademarked ingredients of the highest quality. Our serving sizes are based on doses used in clinical trials and other published data, and the ingredients used in our products have been tested for efficacy in clinical trials and laboratory studies.
